91380

CAD inkjet-paper standard

Product description:

Bright white inkjet paper for monochrome and colorline plots with high resolution and good contrast; short drying time. ECF-elementary chlorine free.

Specific feature:

91380 is a classic, super-white, plotter paper in the 80 g/qm category. It is extremely suited for high-contrast line- and screen-process plots with very good resolution. Fast drying and very good contrast mark this universal paper. A quality paper with smoothed satinated surface for the output of black/white line and screen-process plots on all common inkjetplotters. 91380 is suitable also for CAD-colorline-plots on HP Designjet 750C. The well opaque and standard matt 91380 is also suited for large format copiers and laser plotters. It has very good offset printing properties and is very well applicable for all types of hand recordings, as well as erasable. Short drying times and very good sharpness of outline mark this paper. Archive-stability as per ISO 9706-1994 ENVIRONMENTAL TIP: 91380 is produced absolutely acid-free, made of ECF chlorine-free cellulose (RAUCH environmental warranty).

Processing:

For quality reasons the processing and storage of 91380 should take place in a climate from 45 to 55% relative humidity and at a temperature from 17-30°C. Keep in the original packing carton box and PE-bag at a cool and dry place, clean and dustfree.
