

## Rauch Canvas Art Production

### Matt white polyester canvas

#### Product description:

Clearly and regularly textured polyester-canvas for interior and Pop-Art-prints in high volume production. Highly tear-resistant polyester fabric in a 2:1 weave. Bright colors, large color space and outstanding blacks.

#### Specific feature:

PopArt Canvas light is a single side coated fabric made of 100% polyester, developed for intensively colored graphic applications on all common inkjet plotters. This product is particularly suitable for picture presentations of graphics, and art and photo reproductions. The clear and regular texture of the fabric is visible after printing. Due to the use of 100% polyester as opposed to cotton, the base material has no irregularities. The inkjet coating shows good water resistance. Due to the flexible coating PopArt Canvas light can easily be stretched with minimal cracking. Pigmented or UV-inks are highly recommended for long term applications. PopArt Canvas light can be sewn and used as a banner. Free hanging prints should be suitably anchored, otherwise curling on the edges could occur. Liquid lamination with our protective coatings extends the life of the prints.

#### Processing:

Processing and storage of PopArt Canvas light should take place in a climate from 35 to 65% relative humidity and at a temperature of 10-30°C. Turn OFF the printer's automatic cutter! Before and after printing, feed approx. 50cm and cut manually. Store in the original packaging.

#### Technical specification:

Material:	GEWEBE
Application Area:	AUCH KURZFRISTIG IM AUSSENBER
Surface:	MATT
Specific gravity:	270,00g/m <sup>2</sup>
Thickness:	345,00µm
B1-cert.:	nein
Cold lamination:	nein
can be sewn:	ja
can be eyeletted:	ja
can be stretched:	ja
water resistant:	ja
scratch resistant:	ja
Opacity:	>90%
Color L:	95.0 ±1,5
Color a:	1,5 ±1,5
Color b:	-12 ±1,5
UV-whiteness:	110 ±10
Specular gloss:	2-3
Garn:	600D x 600D
PVC frei:	100%
