

signJET RollUp 170S

Satin PP-Display-Film, white back

Product description:

White satin tear resistant polypropylene film with water resistant coating for solvent and eco-solvent inks. Features high stability, print sharpness and colour brilliance.

Specific feature:

RollUp 170S is a satin coated and tear-resistant Polypropylene-film with a waterfast coating for solvent inks. The Product has a paper-like touch. The printouts are characterised by high color brilliance, high image definition and perfect flatness. Special solvent coating allows very good water resistancy when printed with Eco-Sol-, or Solvent inks. The film has very good lamination characteristics (cold-/and hot laminates). The special solvent coating allows to combine the ecological and physical characteristics of a polypropylene film with the advantages of very durable inks. RollUp 170S with a white backing is both indoor and outdoor usable.

Processing:

To maintain the high quality of SOL-PP 170 satin should be stored and converted in a climate of 35-65% relative humidity and at a temperature of 10-30°C. The material should be stored in its original packaging (cardboard box and PE bag). Avoid touching the inkjet coating (wear cotton gloves).

Technical specification:

Material:	FOLIE
Surface:	SEIDENMATT
Specific gravity:	130,00g/m ²
Thickness:	170,00µm
B1-cert.:	nein
Cold lamination:	ja
Heat lamination:	ja
can be eyeletted:	ja
can be stretched:	ja
water resistant:	ja
scratch resistant:	ja
DIN ISO 16245	Nein
